

With its rounded edges and bent-pipe curves the Oasis collection has long been an industry standard with original models still on their sites and serving the public for nearly 20 years.

Perforated-steel seating surfaces and screens allow air circulation, and coupled with round-tube and curved structural elements, this collection meets the needs of its users with comfort, attractive style, exceptional strength, durability, safety, vandal resistance and ADA access sensitivity.

Oasis shelters are available in many sizes and shade-screen configurations with five bench variations, matching trash receptacles, free-standing ash urns, leaning rails, free-standing shade screens, ad benches, optional solar lighting packages, and integral wall mounted or free standing ad kiosks.
