

The Summit offers exceptional open space and is ideal for the more rural or suburban setting. The high gabled roof accommodates custom cut logos, and optional architectural embellishments at its baseline. Multiple weather/shade screening options and configurations are available.

True to its sustainable styling, the Summit Collection features 100% recycled plastic lumber accessories that complement the structure's rustic style. Impervious to rot and insects and requiring low maintenance, plastic lumber products also are excellent stand-alone pieces in high traffic areas, parks, malls and residential communities.
